

Career Opportunity in 403(b) Market

If you are a Registered Representative currently working with school district employees, is your broker/dealer providing support for your 403(b) business?

If not, Lincoln Investment Planning, Inc. may be able to help you. We specialize in helping teachers, staff and others in the educational community plan to retire well.

Our representatives come from diverse backgrounds but have in common self-motivation, people skills, ethical standards, and desire to succeed. We provide technical support, training, and access to the unique 403(b) marketplace. Our financial representatives are not employees. Each is an independent contractor who owns his or her own business and is responsible for making independent decisions that are in the best interest of his or her clients.

Perhaps you are, or know someone who is, looking for support and opportunity to build or maintain a business helping educators retire well.

If so, call us at (518) 296-8696 and ask for Dick Pinder or Kim Spaulding.
